PRODUCT DETAILS

Enjoy Perfect High-Definition Movie Soundtracks

The HT-R395 receiver can decode Dolby® TrueHD and DTS-HD Master Audio™—the two most popular lossless Blu-ray formats that deliver a soundtrack identical to the studio master, so you're hearing it exactly as it's meant to be heard.

Latest Spec HDMI® (4 In / 1 Out)

All four HDMI terminals support HDCP 2.2 copy protection and High Dynamic Range (HDR) for 4K/60 Hz video on the very latest TV sets—enough to connect your consoles, BD Player, and media streamer. Signals from your DVD player and VCR are upconverted and sent to the display through the same HDMI cable. Super neat, super simple.

True Power from Discrete Amplifiers

Genuine, discrete analog amps (not cheap IC chips) deliver high instantaneous current to control the speakers for powerful and dynamic audio reproduction. This precise power is the cornerstone of Onkyo's amplification philosophy.

Solid and Compact Speaker System

The HT-S3800 ships with a quality six-piece surround-sound speaker system that's just the right size for smaller movie, computer, or dorm rooms. Front L/R, center, and two surround speakers contain full-range drivers that capture a wide frequency spectrum, so you get the whole audio picture, while the slimline subwoofer delivers a satisfying oomph to every explosion and bass-drum kick.

Bluetooth Audio Streaming

Stream virtually any audio from your compatible smartphone, tablet, or PC application to your home

cinema. Just press a button on the receiver's front panel, pair your device, and start enjoying room-filling sound. There's also a USB for wired playback of MP3s from flash-memory drives.

Easy Connection Guide on Back Panel

Connections to speakers and external devices are illustrated and clearly labeled on the back panel. We've even included color-coded speaker cables so you can get started right away.

For more specifications, see the datasheet in the downloads tab.

Supplied Accessories

- Indoor FM antenna
- AM loop antenna
- Color-coded speaker cables
- Quick start guide
- Remote Controller
- AAA (R03) batteries x 2
