## PRODUCT DETAILS

### Add dynamic Hi-Fi sound to your entertainment mix

Delivering 110 W/Ch of high-current power from a fully discrete low-impedance amplification system, the TX-8130 plays your audio sources with dynamic energy and pure musicality. Custom-spec components are used throughout, from high-current EI transformer, twin 8,200 F capacitors, and rigid oval chassis to the 384 kHz/32-bit DAC that decodes Hi-Res 192/24 and 5.6 MHz DSD files streamed over the network.

Whether enjoying Spotify, Deezer, or TuneIn Radio (with song selection handled via remote app) or kicking back with a stack of LPs, listeners are rewarded with lush, detailed, and deeply satisfying sound that few amps at this price can equal. Other details such as BGM presets for one-touch playback of AM/FM/Internet Radio stations, generous analog/digital connectivity, and rock-solid build will confirm your impression of quality, value, and versatility.

## Highlights

- 110 W per Channel
- Internet Radio and Music Streaming including Spotify Connect
- Phono Input
- Hi-Current Amp Design
- 384 kHz/32-bit Hi-Grade DAC
- 4 Quick-Access BGM Presets
