Driving Big Speakers with Boundless Energy
Match your TX-8250 with stereo loudspeakers and add genuine hi-fi sound to all your entertainment sources. Discrete high-current amplifiers, massive transformer, and custom-made capacitors assure effortless driving power with very low distortion. High current grips the speaker cones for more accurate control, restoring vitality and detail to music. Non-phase-shift circuitry, meanwhile, clearly focuses the audio image and reproduces a wide frequency bandwidth for best performance with Hi-Res Audio and vinyl sources.
