Stijl

STANDARD, UK VERSION

PRODUCT DETAILS

To get the most out of your Onkyo multichannel A/V receiver, you need to partner it with a compatible speaker package—one like the SKS-HT528. This 5.1-channel system comprises five full-range bass-reflex speakers rated at 120 W and a beefy, down-firing 150 W subwoofer. Together, they create a well-balanced, fully enveloping soundstage that brings your movies and music convincingly to life.

Color-coded speaker cables and terminals make for an easy set-up, while wall-mounting capability provides extra layout options in your entertainment space. The system comes in a stylish black gloss finish that matches practically any room décor and any other component.
